

## The AQUAMAX MAGNUM

### MOST ADVANCED FEATURES INCLUDE:

- Stainless-steel (316) axles in every Wheel Tube and roller end.
- Extra-wide (1.25in), extra-thick Drive Belts and rugged drive-train for extra-durability and longer service intervals.
- Air Sensors for zero depth entry pools (a \$185.00 value).
- Emergency power cut off if robot is operated out side of water.
- Obstacle Sensors, similar to Infra-Red (a \$290.00 value)
- Aqua Smart System algorithmic program provides efficient cleaning in approx. 4 hours. Determines long and short axis of your pool.
- Internal timer shuts machine off after completion of cleaning cycle.
- Programmable run-time. Select 3 hours or 5 hours.
- Programmable Delay Mode. Set cleaner and it will wait 2 hours while the debris settles in the pool. Then it will begin the cleaning cycle. No supervision required.
- Self monitoring circuitry for electrical fault detection.
- Emergency power cut off if robot is operated out side of water.
- 120' floating cable for the Magnum. 100' floating cable for the Magnum Junior.
- Full 4-way radio remote control with manual override feature included. Vacuum will clean walls and waterline in manual (supervised) mode.
- 1 fine filter bag included. A mesh bag is available for large size debris.
- PVC Super Brush/Super Wheel configuration to accommodate most pool textures. PVA Climbing Brushes for smooth surfaces are available upon request at the time of ordering.
- Durable steel UltraKart caddy included (a \$310.00 value)
- 2 year, 300 cycle warranty for all major parts, Motors, plastics and electronics.
- Shipping weight 90 lbs.

Available in 115Volt or 230Volt.
