

OUR PASSION

We believe a pool should be full of memories.
We believe that children should splash.
We believe in laughter, smiles, cannonballs.
We believe in Marco Polo.

We believe that an hour more with your friends and family is gold. Time goes by too fast. The rearview mirror is full of memories around the pool, long summer days, grilling with charcoal, fresh towels, floating on rafts, chicken fights, snorkels, goggles and swimmies.

We believe in clean water.
We believe in helping you protect your family. Knowing that the water you swim in is as pure and as close to nature as it can be. We like soft skin, opening our eyes underwater and tea parties at the bottom of the pool.

We believe that water starts pure.
We believe that water should remain pure.

We are Aquabot.
We are the Keepers of Pure.

DID YOU KNOW...

1982

The year we originated the first self contained robotic pool cleaner in the United States.

The average cost per cleaning hour to make your pool crystal clear.

\$0.05

*30%

The average amount you'll save on chemicals.

What you'll get back so you can start enjoying your pool instead of worrying about it.

KEEPERS OF PURE

FEATURES

We have the widest variety of products that offer the most innovative features and benefits in the industry, all to help you maintain a clean and healthy pool.

- The strongest pumps in the industry... can generate up to 85 gallons per minute to help ensure all dirt and debris are removed.

- The industry's best filtration systems that can capture debris as small as 2 microns in size.

4WD

- **4WD system that powers the cleaner up walls and over obstacles

- Top loading filter baskets for easy access and cleaning.

- The best water mixing to help reduce chemical usage.

- Power Washing Jets that pressure wash the pool floor to loosen stubborn debris and algae.

- Remote Control capabilities to help spot clean tough to reach areas.

The Aquabot is more than just a pool cleaner. It is part of the fabric of your summer experience that will help you and your family enjoy your pool for years to come.

A HEALTHIER CLEAN

Aquabot robotic pool cleaners are engineered with the strongest pumps and finest filtration in the industry.

They remove more debris and finer particulate to keep pools physically cleaner... substantially reducing the amount of chemicals needed.

SAVINGS

Aquabots are a great investment to help maintain your pool. In addition to saving you time so you can enjoy your pool more, Aquabots are great for helping you save:

WATER

- Save on backwashing. All debris is self-contained in unit = Less Backwashing.

CHEMICALS

- Better water circulation and finer filtration help you save up to *30% on your total chemical usage.

ENERGY

- Aquabots cleaning cycle costs about 5¢ per hour saving you almost 40% on your pool electric usage.
- † 93% more efficient than a standard main pool filtration systems

Our products also save you something that you can't put a price tag on... Time. By using an Aquabot robotic pool cleaner, you can gain time back to enjoy your pool instead of worrying about it. You can spend more time with family, friends or even just some quiet time poolside relaxing.

* Actual savings rates may vary based on cleaner type, pool size and usage.

** Select Models

† Recent independent study by the National Plasterers Council. This study concluded that the use of self contained robotic pool cleaners were 93% more energy efficient than a standard main pool filter system.
